Riverside Medical Group - Cardiology

Patient: Harriet M. Quigley
MRN: NDV2-44172
Date of birth: 12 March 1974
Sex: Female
Letter date: 14 September 2026
Referring physician: Dr. Anil Banerjee
Accession no.: ACC-NDV2-7781

Cardiology Clinic Letter

Dear Dr. Banerjee, thank you for referring Mrs Quigley, whom I saw in clinic today for intermittent palpitations over the last three months.

Her resting ECG shows sinus rhythm at 72 beats per minute with normal intervals. A 48-hour Holter monitor recorded occasional isolated atrial ectopics and no sustained arrhythmia.

Echocardiography shows a structurally normal heart with preserved left ventricular function. I have reassured her and advised reducing caffeine. No follow-up is required unless symptoms change.
